DEVELOPMENT  
IMPETUS THROUGH  
INTER- AND TRANS-  
DISCIPLINARY DESIGN  
PROCESSES

## KEYWORDS

Forensic design strategy, green building design, environmental design, inter- and trans-disciplinary design process, energy.

## AUTHOR

PhD candidate & former Adapt-r fellow at KU Leuven, Faculty of Architecture, Campus Sint-Lucas, Brussels  
<http://www.grundstein.cc/>  
[michael@wildmann.com](mailto:michael@wildmann.com)

## SUPERVISORS

Johan Verbeke (+),  
Laurens Luyten (KU Lueven)

With the aim of building an energy-efficient environment, the design and planning processes of buildings and cities become more and more complex. The current planning processes are even more multidisciplinary. If these are replaced by inter- and trans-disciplinary processes, new developments are taking place. In Forensic Design Strategy the effects of the various possible approaches of the individual planners are set as a function of one another in order to get the best overall solution and not the best single solution for each department.
